

PRAGYAN (■■■■■■■■■■) – 3-Minute Demo Video Script

AI-Assisted Panchayat-Level Weather & Climate Disaster Forecasting System | SIH 2026

Target Duration: Exactly 3 Minutes (180s)	Pacing: 6 Segments × 30 Seconds	Language: Hinglish (Bilingual Pitch)
Resolution: 1080p (1920×1080 Full HD)	FPS / Audio: 60 FPS, Crystal Clear Mic	Dev Server: localhost:5173 / edge-to-edge UI

- Pre-Recording Setup (2-Minute Preparation):**
- **Browser:** Chrome in Full Screen (F11), Zoom 100%, DevTools closed.
 - **Map State:** Reset map to Madhya Pradesh view, show layer controls, ensure dynamic cascaded dropdowns are visible.
 - **Audio Voiceover Tone:** Confident, energetic, empathetic towards Indian farmers, technically sharp for evaluation committee.

SEGMENT 1	0:00 – 0:30 (30 Sec) — Problem Context & The Pragyan Cadastral Revolution
Screen Actions to Show (Choreography): • 1. Start on the full Pragyan Dashboard hero view (full edge-to-edge layout). • 2. Cursor moves to the Hero Headline: 'Panchayat-Level Weather & Climate Disaster Forecasting'. • 3. Hover briefly over the National Pilot Gauge showing 603 Cadastral Panchayats & 313 LGD Blocks. • 4. Point out the coarse 25km IMD grid vs Pragyan's 1km high-resolution downscaling badge. • 5. Show the live Model Consensus widget indicating 4 Global Ensembles (ECMWF, GFS, ICON, NCMRWF).	Spoken Voiceover Script (Hinglish): "Namaste judges! Traditional weather forecasts 25 se 50 kilometer ke broad grid par aate hain, jiska matlab hai ki ek taluka ke ek gaon mein sookha aur doosre gaon mein flash flood hota hai, phir bhi advisory same rehti hai! Isi critical gap ko khatam karne ke liye humne banaya hai PRAGYAN—Bharat ka pehla AI-powered, cadastral-level climate intelligence platform! Pragyan global models jaise ECMWF aur GFS ko high-resolution local terrain ke sath fuse karke, har Gram Panchayat ko 1-kilometer precision par 10-day hyper-localized forecast provide karta hai!"
Key Feature Tags: 25km Grid → 1km Downscaling 603 Cadastral GPs Multi-Model Consensus (ECMWF + GFS)	Pacing Tip: Speak steadily, match cursor highlight with spoken keywords.

SEGMENT 2	0:30 – 1:00 (30 Sec) — Interactive 4-Tier Boundary Layers & Cascaded Navigation
Screen Actions to Show (Choreography): • 1. Focus cursor on the top Cascaded Navigation Bar (State → District → Block → Gram Panchayat). • 2. Click District dropdown: show 55 Madhya Pradesh districts (Indore, Bhopal, Ujjain, Dhar, etc.). • 3. Select Indore: Map smoothly flies and zooms into Indore district boundaries. • 4. Show the Layer Control Switcher on map top-right: Toggle 'Block Outlines' (313 LGD blocks rendered in cyan) and 'Cadastral GP Boundaries'. • 5. Change Block to Sanwer, watch GP dropdown instantly populate with its 121 official Gram Panchayats.	Spoken Voiceover Script (Hinglish): "Dekhiye hamara interactive 4-tier cascaded navigation bar! Yahan user bina kisi lag ke State, District, Block aur Gram Panchayat level tak drill-down kar sakta hai. Jaise hi hum Indore select karte hain, map seamlessly Indore boundary par zoom karta hai. Map par humne actual Survey of India aur LGD official boundaries integrate ki hain—313 complete Blocks aur cadastral Gram Panchayat polygons! Ab jaise hi hum Sanwer block select karte hain, system dynamically 121 official Gram Panchayats update kar deta hai with real-time vector rendering!"
Key Feature Tags: Full 55 MP Districts 313 LGD Blocks Dynamic Vector Polygons Sub-second FlyTo Zoom	Pacing Tip: Speak steadily, match cursor highlight with spoken keywords.

SEGMENT 31:00 – 1:30 (30 Sec) — Dynamic Weather Synchronization Beyond Sanwer	
Screen Actions to Show (Choreography):	Spoken Voiceover Script (Hinglish):
1. In GP dropdown, switch from <i>Sanwer</i> to Ajnod (or click Ajnod polygon on map). 2. Point to the 10-Day Hyperlocal Weather Forecast Card updating dynamically with Ajnod's exact elevation & coordinates. 3. Hover along the forecast chart: show the 80% Confidence Interval (CI) Band depicting ensemble variance. 4. Toggle view from <i>Focused</i> to <i>Small Multiples</i> (Temperature, Rain, Wind, Humidity graphs). 5. Now switch District to Bhopal and select Huzur to prove the entire state is dynamically connected.	"Sabse badi technical achievement: Pragyan kisi static data par hardcoded nahi hai! Jaise hi hum Sanwer ke andar Ajnod gram panchayat choose karte hain, instantly Ajnod ke exact elevation aur micro-climate ke according 10-day forecast card synchronize ho jata hai! Chart par aap dekh sakte hain 80% Confidence Interval bands, jo batate hain ki ECMWF aur GFS models mein kitna consensus hai. Aur agar hum Bhopal ke Huzur block mein shift karein, to system instantly Huzur ke live meteorological vectors load kar deta hai—zero latency, true state-wide agility!"
Key Feature Tags: Zero-latency synchronization 80% CI ensemble uncertainty Elevation micro-climate adjustment	<i>Pacing Tip: Speak steadily, match cursor highlight with spoken keywords.</i>

SEGMENT 41:30 – 2:00 (30 Sec) — Explainable AI (SHAP) & Top-20 High-Risk Village Ranking	
Screen Actions to Show (Choreography):	Spoken Voiceover Script (Hinglish):
1. Scroll down to the Top 20 Vulnerable Gram Panchayats Ranking Table. 2. Point to Risk Scores (Extreme / High / Moderate badges) and Disaster types (Flash Flood, Heatwave, Drought). 3. Click on the Panchayat Risk Dossier: open the SHAP Explainability Waterfall. 4. Hover over the top SHAP drivers: <i>Rainfall Anomaly</i> (+38%), <i>Soil Saturation</i> (+24%), <i>Steep Slope</i> (+18%). 5. Scrub the 10-Day Time Horizon Slider (Day 1 to Day 10) to show risk progression over time.	"Pragyan sirf weather predict nahi karta, yeh disaster risk ko explain karta hai through Explainable AI (XAI)! Humari Top-20 Vulnerability Table automatically Block ke highest risk villages ko rank karti hai. Aur sabse khaas baat—humara SHAP waterfall engine! District Collector ya SDM yeh dekh sakte hain ki kisi gaon mein High Risk kyu hai: kya 48-hour rainfall anomaly zimmedar hai, soil moisture saturation 90% cross kar chuka hai, ya steep slope runoff badha raha hai. Humara Day-Rail scrubber agle 10 dinon mein risk ka progression bhi visualizes karta hai!"
Key Feature Tags: SHAP feature attribution 10-Day risk scrubber Top-20 automated ranking Multi-hazard alerts	<i>Pacing Tip: Speak steadily, match cursor highlight with spoken keywords.</i>

SEGMENT 5		2:00 – 2:30 (30 Sec) — Hyperlocal Vernacular Farmer Advisory & Voice TTS	
Screen Actions to Show (Choreography):		Spoken Voiceover Script (Hinglish):	
1. Click the Farmer Mode toggle switch in the navigation bar. 2. Show the clean, simplified farmer-friendly advisory card with crop recommendations (Soybean, Wheat, Mustard). 3. Highlight the <i>Do's & Don'ts</i> (e.g. 'Postpone pesticide spraying due to 78% thunderstorm probability'). 4. Click the Play Hindi Audio (■■■■■ ■■■■■■) button: show the audio wave animation and let 2 seconds of clear Hindi speech play. 5. Point to the Share to WhatsApp button for instant Kisan Call Center / Panchayat WhatsApp broadcast.		<i>"Complex scientific data kisan tak kaise pahuchega? Enter Farmer Mode! Ek single click par interface simple, local language advisory mein transform ho jata hai. Yahan kisan bhaiyon ko clear recommendations milti hain: jaise kal 78% thunderstorm ki wajah se keetnashak chhidkav postpone karein. Aur jin kisanon ko padhne mein asuvidha hai, unke liye humne diya hai Vernacular Hindi Text-to-Speech! Ek tap par system shuddh Hindi mein audio advisory sunata hai, jise single tap se WhatsApp groups par bhi share kiya ja sakta hai!"</i>	
Key Feature Tags: Bilingual advisory Vernacular Audio TTS (Speech Synthesis) WhatsApp 1-tap dissemination		Pacing Tip: <i>Speak steadily, match cursor highlight with spoken keywords.</i>	

SEGMENT 6		2:30 – 3:00 (30 Sec) — Disaster Warning (CAP 1.2), Scientific Honesty & Grand Finale	
Screen Actions to Show (Choreography):		Spoken Voiceover Script (Hinglish):	
1. Navigate to Disaster Warning Center: highlight <i>OASIS CAP 1.2 XML</i> standard compliance. 2. Click Download CAP XML Alert button: briefly show the standardized emergency response payload. 3. Scroll to the Climatology Verification Ladder: show IMD benchmark curves, Brier Score, and reliability diagram proving model honesty. 4. Zoom out map back to full state overview while cursor hovers over the Pragyan brand logo. 5. End with team details / closing slide and confident smile.		<i>"Disaster management ke liye Pragyan strictly follow karta hai National NDMA OASIS CAP 1.2 standard, jisse state disaster authorities instant XML alerts siren network aur telecom par trigger kar sakti hain! Plus, humare system mein hai Scientific Honesty—hum IMD ke 30-year climatology ground-truth benchmarks ke sath apne Brier score aur reliability curves openly display karte hain. Pragyan transforms climate vulnerability into proactive grassroot resilience! Dhanyawad, Jai Hind! We are now open for your questions."</i>	
Key Feature Tags: OASIS CAP 1.2 Compliant IMD Climatology Benchmark Brier Score 0.082 Grassroot Impact		<i>Pacing Tip: Speak steadily, match cursor highlight with spoken keywords.</i>	

Winning Tips for SIH Jury & Video Recording:

1. **Seamless Transitions:** Practice the clicks between 0:30 and 1:30 (District → Block → Ajnod GP → Huzur GP) so there is zero fumbling.
2. **Highlight the AI / XAI:** SIH judges look for actual ML depth. Spend full 30 seconds on the SHAP waterfall at 1:30.
3. **Social Impact:** The Vernacular Audio TTS and WhatsApp integration demonstrate direct empathy and usability for non-literate farmers.
4. **Standards Compliance:** Highlighting OASIS CAP 1.2 XML proves enterprise and government integration readiness.
